## 1. Self Introduction

I took a course in web and mobile development. I worked on a few projects and i'm actually working on a mobile project. I also took a course in datascience. I've grown with the principle and the tradition given by our true parents and even if i'm not completely following the tradition, i'm trying my best into practicing it. My weak point : i'm weak willed, i like to complain about a lot in my life. My strong point: humble, like to help, forgiving.

---

## 2. Dreams and Wishes

I like reading some books and playing some games. In my life, i want to discover my unique talent, be useful in the providence and help my parents become cheonbo couples. Yes, sometimes. When i think about the last events in my life, i don't think i would be here today. He protects me every day and guide me on the important moments in my life. I think that i can contribute in the achievement of heavenly parent's wish not only by praying and support spiritually the persons who devote themselves for the sake of heavenly parent but also by helping my parents in becoming cheonbo couples and it's the principal reason of why i'm actually searching for a job

---

## 3. Family Introduction

My parents are my supporters and my pillars. They come just after the true parents and heavenly parent. I have a good relationship with my brother and my parents. If he wasn't here, i would have been lonely even if he makes me sometimes angry. One of my happy moments was when my father came home with our first computer, we were much younger ( me and my brother) we were excited after seeing this and couldn't wait for him to install. We just wanted to play with it already.

---

## 4. Your Ideal Type and Ideal Partner

My future partner must be really spiritual, have a strong comprehension of the heavenly parent's wish. He must complete me in what i lack and i must be able to complete him, be someone i can count in, can be flexible in some situations, attentive. I think that the heavenly parent would want for me someone that i can support and help and together we can contribute in the providence. I want a happy family with children living with the heavenly parent and true parents in the center.

---

## 5. Jeongseong

I've been offering conditions of sincere devotions for a while now alone or with my parents. thanks to these I feel much calmer and have the determination to move forward, even if it's difficult. I think that all my difficulties and experiences have helped me to grow and achieve some of my goals.
